Dubbing Specialist (Freelance) – ElevenLabs

Please describe in detail one element of dubbing or audiovisual translation you are particularly skilled at.

I'm skilled at dubbing animated content. I've translated, recorded and cast hundreds of episodes for DreamWorks, Netflix and Apple TV, localized for a Danish audience. I'm particularly strong at voice casting and production coordination: between 2016 and 2021, at STC Studios and Eurotroll, I booked and cast voice actors for dubbed productions, matching each voice to the original character's age, tone and energy so the performance sounds natural in Danish rather than translated. I also built and maintained DubManager, STC's in-house system for dubbing workflows, so I understand the whole pipeline: script, timecodes, recording sessions and delivery. Today I develop a SaaS platform for dubbing studios and work with AI dubbing in ElevenLabs, so I'm comfortable combining human performance with AI tools and knowing when each one is the right choice.
